

A Marbled Godwit bird is shown in profile, facing right. It has a long, straight, pinkish-red bill that tapers to a dark tip. The bird's body is covered in intricate, dark brown and black mottled patterns over a lighter tan or buff-colored base. It stands in a wet, marshy environment with tall, thin grasses and some green leafy plants. The background is a soft-focus view of a body of water under a clear sky.

# Marbled Godwit
